

“As an undergraduate student in animal sciences, you have numerous opportunities, many of which you may not even be aware! Because of ASAS, I can now take an active role in discussing research with colleagues, networking with university and industry professionals, gaining valuable skills for my career, and learning how to become a more active face of animal science. Some of our newest activities have put animal sciences in new places, on Facebook, Twitter, a blog, in Washington, D.C., and at universities and companies across the world.”

–Heather White  
ASAS Graduate Director

# UNDERGRADUATE MEMBERSHIP

THE AMERICAN SOCIETY  
OF ANIMAL SCIENCE

## MEMBERSHIP BENEFITS

- Full web access (<http://jas.fass.org/>) and the option to receive a printed copy of each monthly Journal of Animal Science
- ASAS newsletters, membership directory, and advance registration information for national and sectional meetings
- Reduced fees to submit manuscripts for publication in the Journal of Animal Science
- Reduced registration rates for the annual meetings
- Eligibility to provide personal leadership by serving on the Board of Directors and society committees, or filling other society needs
- Eligibility for prestigious society-sponsored awards

In the busy undergraduate world of lectures, midterms, and finals, it is easy to overlook the simple steps you can take to ensure a great career in animal science. By joining the American Society of Animal Science (ASAS), you will be connected with thousands of your peers and future colleagues worldwide.

ASAS supports your career goals by establishing formal and informal mentorships, providing online resources, and working in Washington, D.C., to advocate for your needs. Our annual national and sectional meetings give students a chance to attend workshops, present research, and network with industry professionals. We provide hands-on education for students through our meetings, the Academic Quadrathlon; we work with student clubs such as Block and Bridle and FAA; and we support further education through our graduate student resources.

As our field evolves, ASAS works to support your career and passion for animal science.

“*Being a member of ASAS has given me opportunities to grow as a scientist and to develop better communication and leadership skills. It has been the place where I've shared my research in presentations and publications, networked with colleagues from around the world, and perhaps most importantly, developed lasting friendships.*

*“My advice to young professionals in animal science is to join ASAS and get involved — it will be the best investment of time and energy they could ever make.”*

—Michael Galyean

Professor in the Department of Animal and Food Sciences, Texas Tech University in Lubbock and ASAS member for 35 years
